

SIVANIKA S

MERN STACK DEVELOPER | FULL STACK SOFTWARE DEVELOPER

+91 99404 40767 | sivanika.dev@gmail.com | linkedin.com/in/sivanika | sivanika-portfolio.vercel.app

PROFESSIONAL SUMMARY

Full Stack Software Developer with 1+ year of professional experience building and deploying web applications using React.js, Node.js, Express.js, MongoDB, Django and Python. Experienced in REST API development, JWT authentication, reusable React components, CRUD workflows, debugging, Git/GitHub and end-to-end feature delivery. Built business applications including an export ERP, SaaS learning platform, product delivery app, IVR feedback system and AI automation workflows. Also delivered 20+ client websites through freelance work.

TECHNICAL SKILLS

Languages: JavaScript, Python | **Frontend:** React.js, React Native, HTML5, CSS3, Tailwind CSS, Bootstrap | **Backend:** Node.js, Express.js, Django, REST APIs | **Database:** MongoDB, SQL | **Authentication:** JWT, Role-Based Access Control | **AI & Automation:** OpenAI API, n8n, Generative AI, Prompt Engineering | **Development:** CRUD, API Integration, Debugging, Testing, Performance Optimization | **Tools & Deployment:** Git, GitHub, VS Code, Vercel, Render, Figma

PROFESSIONAL EXPERIENCE

Software Developer | Media Wave Technologies, Trichy, India Sep 2025 – Present

- Develop and deploy full-stack application modules using React.js, Django and Python, handling features from requirements through production.
- Design and integrate reusable REST APIs with JWT-based authentication and secure coding practices for frontend-backend communication.
- Build reusable React UI components and responsive interfaces to reduce duplicated frontend development and improve maintainability.
- Work with Git/GitHub, peer reviews, debugging and testing to support code quality and release cycles.

KEY PROJECTS

Student-Teacher Portal (SaaS LMS): Built a full-stack learning management platform using React.js, Node.js, Express.js and MongoDB with role-based access for students and teachers, content upload, assignment tracking and progress monitoring.

Export Business ERP Software: Developed an export operations platform covering inventory, orders and shipment tracking, with data models and dashboards providing a unified view of stock, order status and shipment timelines.

Product Delivery App: Developed a cross-platform React Native delivery application with order tracking, REST API integration and real-time status updates to keep customers informed as deliveries progress.

AI Voice Call Automation: Building an AI-powered voice calling automation workflow using n8n and OpenAI for customer call handling, responses and automated follow-up scheduling.

IVR Feedback System: Built an IVR-based customer feedback system that captures structured feedback through call flows and stores results for reporting, trend analysis and follow-up actions.

EDUCATION

B.Voc in Software Development — Holy Cross College, Trichy | CGPA: 7.99 | Apr 2025

Higher Secondary Certificate — Govt. Girls HSS, Koothanallur | Mar 2022

Target role: MERN Stack Developer / Full Stack Developer
